# Teams Account - Features

## Administrator

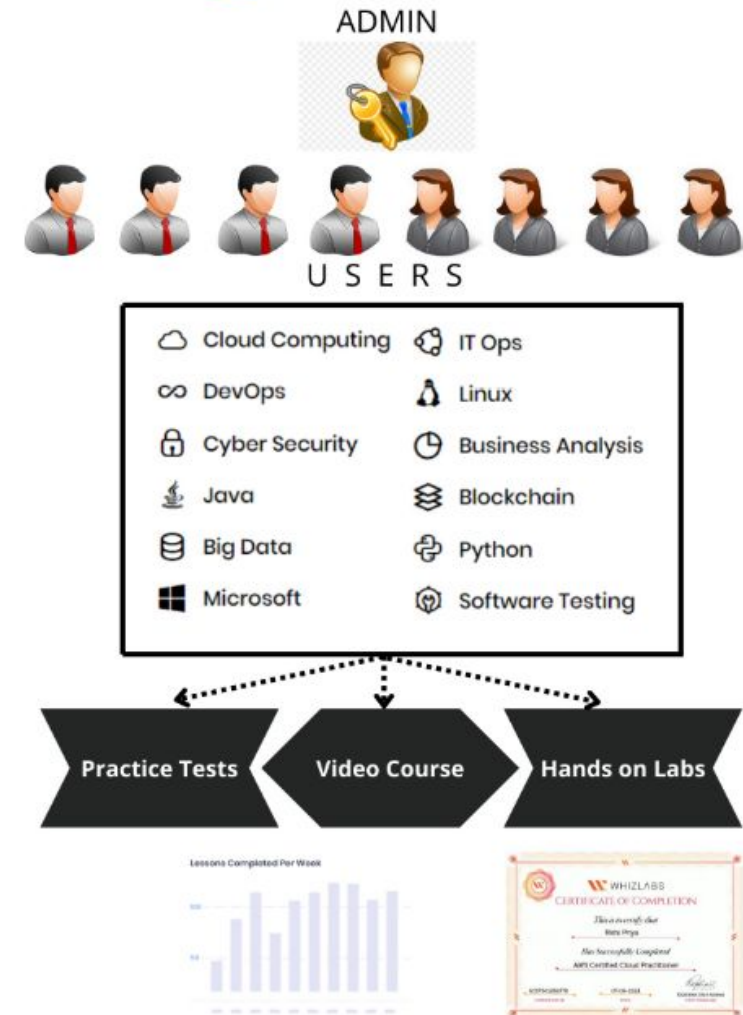

- Users/Teams Management
- Content Delivery, Customized Learning Path
- Daily Reporting
- Monitor the progress and performance of users

## User

- Access to hundreds of courses, practice tests, hands-on-labs, lab challenges & sandboxes
- Access to his own progress and performance
- Hassles free access to live cloud console

## LMS

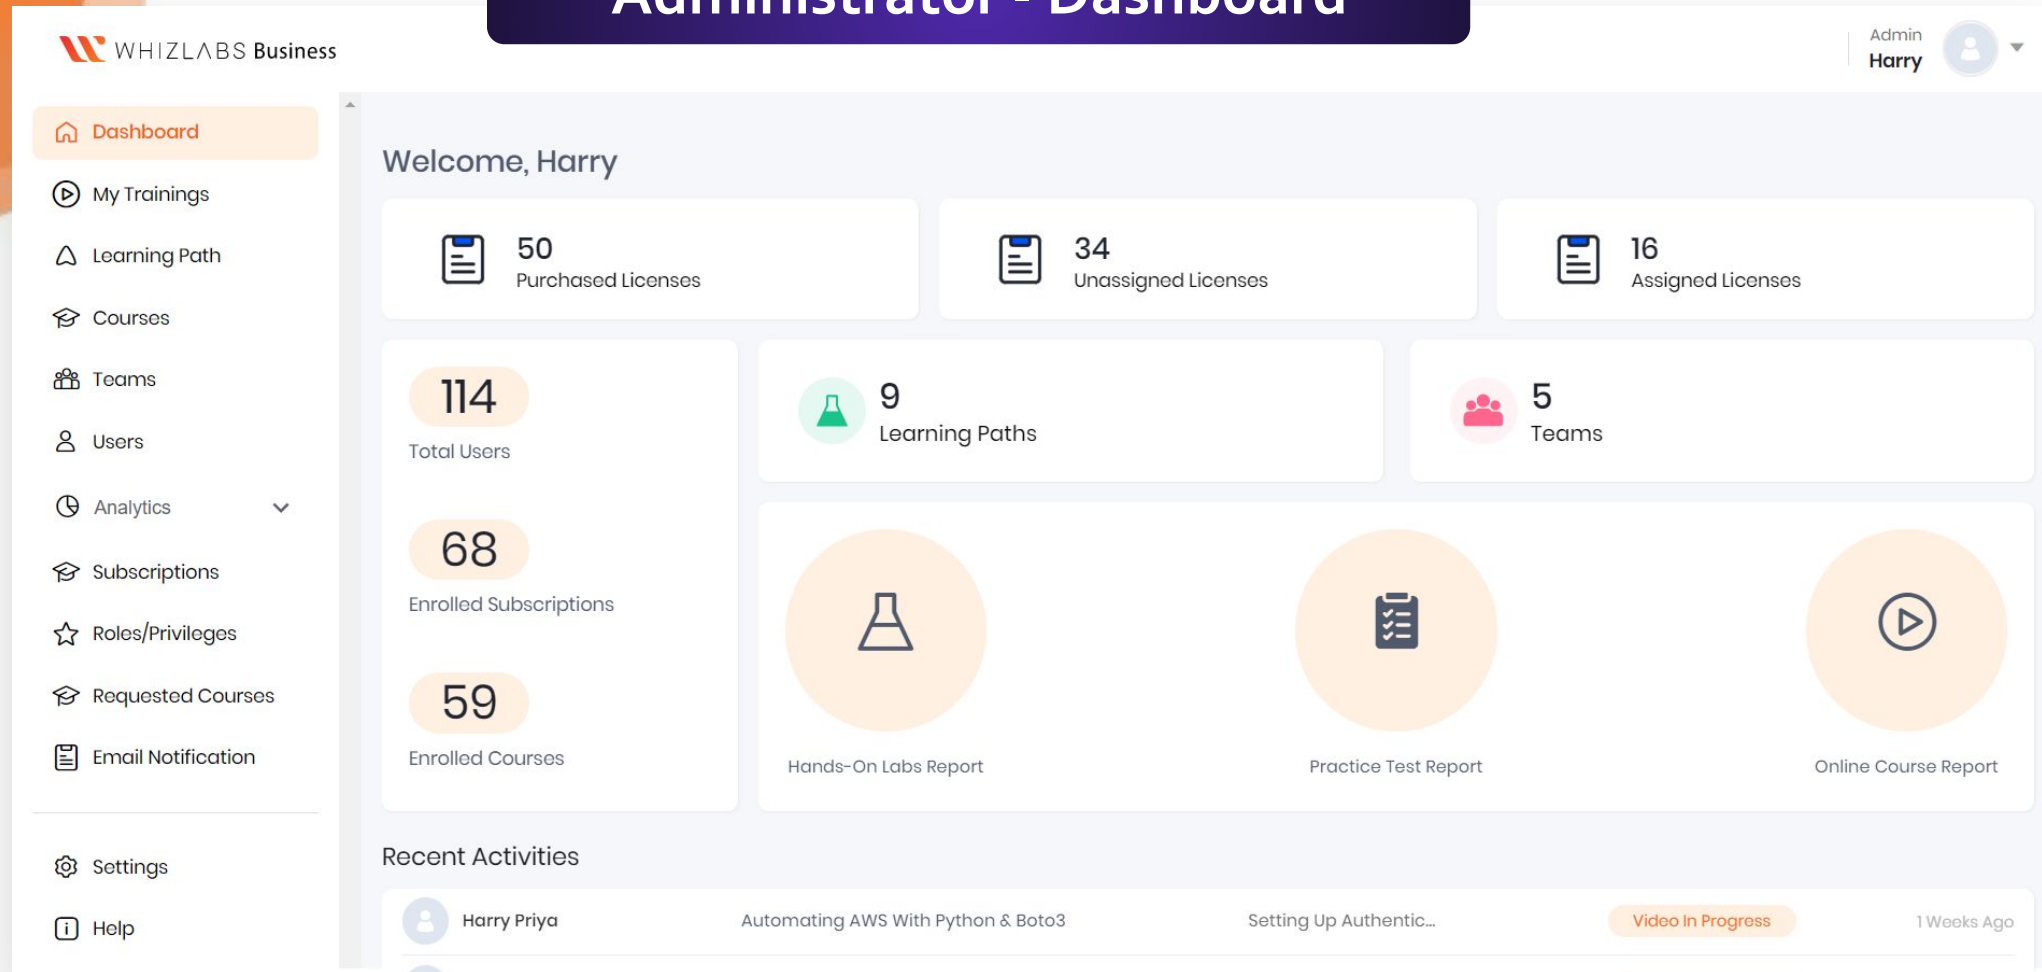

An intuitive user-friendly interface with amazing aesthetics, which provides a seamless access to video courses, practice tests, hands-on labs and sandboxes

# Administrator - Dashboard

# Administrator - Dashboard

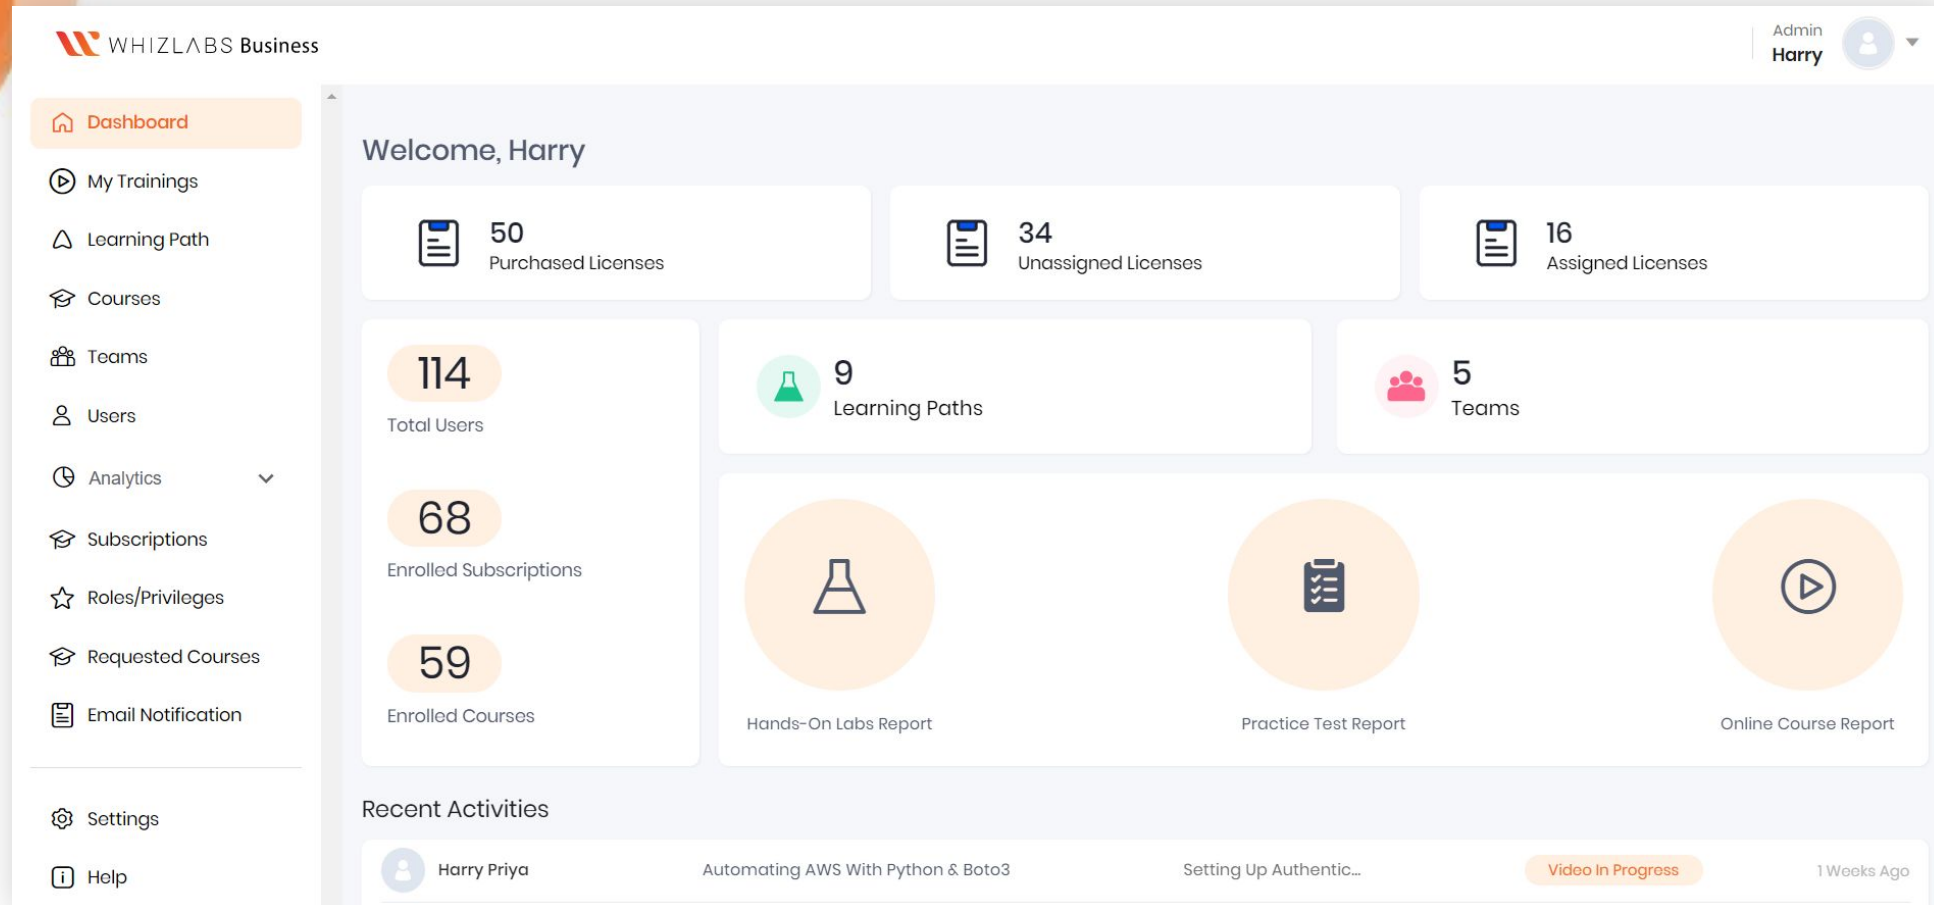

## Administrator - Features

- Users Management
- Creating a Team
- Creating Learning Paths
- Assigning Courses & Subscriptions
- Employee Progress report on Practice Tests, Video Courses & Hands-on Labs

# Administrator - Menus

The screenshot displays the WHIZLABS Business Administrator Dashboard. The interface includes a top navigation bar with the logo and a user profile dropdown for 'Admin Harry'. A left sidebar contains a menu with options: Dashboard, My Trainings, Learning Path, Courses, Teams, Users, Analytics, Subscriptions, Roles/Privileges, Requested Courses, Email Notification, Settings, and Help. The main content area is titled 'Welcome, Harry' and features several summary cards: '50 Purchased Licenses', '34 Unassigned Licenses', '16 Assigned Licenses', '114 Total Users', '9 Learning Paths', and '5 Teams'. Below these are three large circular icons representing 'Hands-On Labs Report', 'Practice Test Report', and 'Online Course Report'. The bottom section, 'Recent Activities', shows a list of actions by 'Harry Priya', including 'Automating AWS With Python & Boto3', 'Setting Up Authentic...', and 'Video In Progress' (highlighted in orange), dated '1 Weeks Ago'.

# Practice Exam Simulator

Home / Dashboard / My Courses / AWS Certified Security Specialty / Practice Test I

Question 35 of 65

Exit Quiz

**Domain:** Identity and Access Management

Which of the following is used as a secure way to log into an EC2 Linux Instance?

- ☐ A. IAM User name and password
- ☐ B. Key pairs
- ☐ C. AWS Access keys
- ☐ D. AWS SDK keys

hide Answer

- ☐ A. IAM User name and password
- ☒ B. Key pairs ✓ Right
- ☐ C. AWS Access keys
- ☐ D. AWS SDK keys

**Explanation:**

**Answer:** B

- Option A is incorrect because the IAM username and password are used for logging in to the AWS console and cannot log in to EC2 instances.

### Allowed AWS Services and Limits

#### Compute

##### Amazon EC2

1. Allow launch and terminate instances.
2. AMI's : Amazon Linux 2 AMI, Ubuntu Server 20.04 LTS, Microsoft Windows Server 2019 Base.
3. Instance Type : t2.micro & t3.micro.
4. Volume : 30 GB, General Purpose SSD (gp2).
5. Allowed Regions : N.Virginia (us-east-1) & Mumbai (ap-south-1)

##### Elastic Load Balancing

1. Allow create, update, delete Application and Network LoadBalancer.
2. Allowed Region : N.Virginia (us-east-1)

##### AWS Lambda

1. Allow create, update, delete Lambda Functions.
2. Allowed Region : N.Virginia (us-east-1)

##### Amazon EC2 Autoscaling

1. Allow create, update, delete Autoscaling Groups.
2. Allowed Region : N.Virginia (us-east-1)

Zone name	Zone ID
us-east-1a	use1-az4
us-east-1b	use1-az6
us-east-1c	use1-az1
