

Whizlabs Business

Portal

Upskill and build better Teams with Whizlabs Business Learning platform. We ensure a comprehensive and scalable learning solutions to enhance Team's productivity

Whizlabs Business Portal

➤ With unmatched credentials of training over 5M professional across 500+ companies, we do understand the pulse of the industry and understand what it takes to train the teams of varying size through our competency-based technology courses.

➤ Whizlabs Business Portal is an integrated Learning Environment, which not only effectively manage the users, host technology courses, but provides powerful analytics so that L&D manager knows how the personnel are making the progress and performing.

Administrator

- Users Management
- Content Delivery
- Daily Reporting
- Monitor the progress and performance of users

User

- Access to hundreds of courses, practice tests, hands-on-labs and lab challenges
- Access to his own progress and performance
- Hassles free access to live cloud console
- Unlimited labs and practice test attempts

LMS

- An intuitive user-friendly interface with amazing aesthetics, which provides a seamless access to video courses, practices tests, and hands-on labs.

Business Portal - Email Notification

The screenshot shows the Whizlabs Business Portal interface. On the left, there's a sidebar with navigation links: Dashboard, Users, Courses, Stats, User Concern, User Course Request, Email Notification (which is highlighted with a dashed green border), Settings, and Help. The main content area is titled "EMAIL NOTIFICATION" and contains a search bar. Below it, under "ENROLL USERS EMAIL NOTIFICATION", there are fields for "Email Notification Status*" (with "Enable" selected) and "Subject*". A preview of the email body shows a welcome message and course details. A rich text editor toolbar is visible above the preview. Three callout boxes provide additional information: one about the auto mailer status, one about the subject line customization, and one about the main body customization. A final callout at the bottom left explains the purpose of the feature.

Whenever a user is onboarded and assigned with a course, an auto mailer is sent to the user

The auto mailer can be 'Enabled' or 'Disabled'

The subject of the mail can be customized as per your requirements

The main body of the mail can be customized

LMS - Hands-on Labs (Detailed Instructions)

Home > AWS > Labs - Learning Path - AWS Solutions Architect Associate > Introduction to Amazon Elastic Compute Cloud (EC2)

Clicking on this button, timer will start for this lab

Lab Steps

Task 1: Launching Lab Environment

1. Launch the lab environment by clicking on **Start Lab**. Please wait until the lab environment is provisioned. It will take less than 2 minutes to provision the lab environment.
2. Once the Lab is started, you will be provided with **IAM user name**, **Password**, **AccessKey** and **Secret Access Key**.
3. Click on the **Open Console**, AWS Management Console will open in a new tab.
4. In the AWS sign in page, the Account ID will be present by default.
 - Leave the Account ID as default. Do not remove or change the Account ID otherwise you cannot proceed with the lab.
5. Copy and paste the **IAM user name** and **Password** into AWS Console. Click on **Sign in** to log into the AWS Console.

Note : If you face any issues, please go through [FAQs and Troubleshooting for Labs](#).

Detailed instructions for lab

Task 2 : Launching an EC2 Instance

1. Make sure you are in **US East (N. Virginia) us-east-1** Region.
2. Navigate to EC2 by clicking on the **Services** menu in the top, then click on **EC2** in the  **Compute** section.
3. Navigate to **Instances** on the left panel and click on **Launch instances**.
